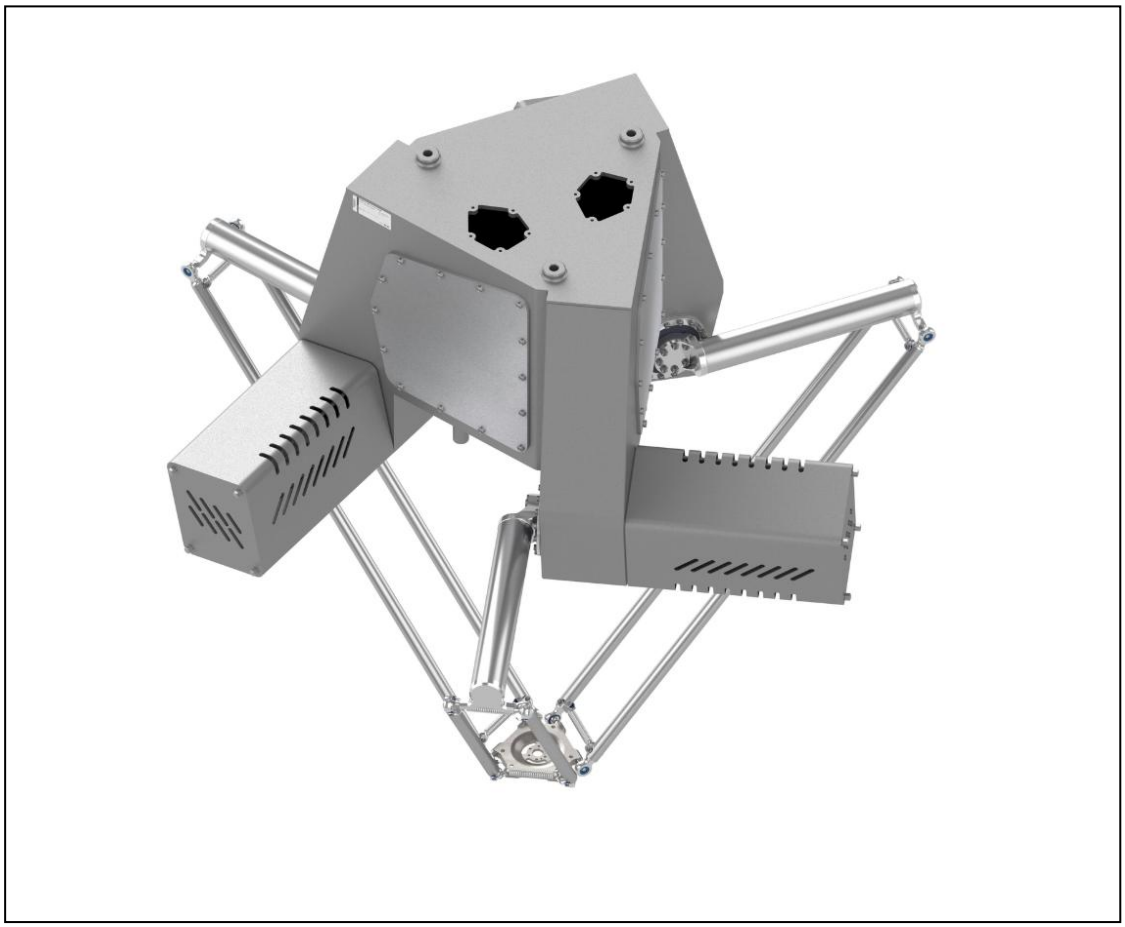
Product End of Life Instructions

Pacdrive Robot P4 / ILM

Pacdrive 3 Robotics



Potential disassembly risks

The information provided in this document assumes that the product is completely de-energized and uninstalled (refer to the instructions provided in the appropriate product manuals).

Dismantling/disassembling the product may entail hazards caused by, for example, sharp edges, chemical aggression or ejected parts.

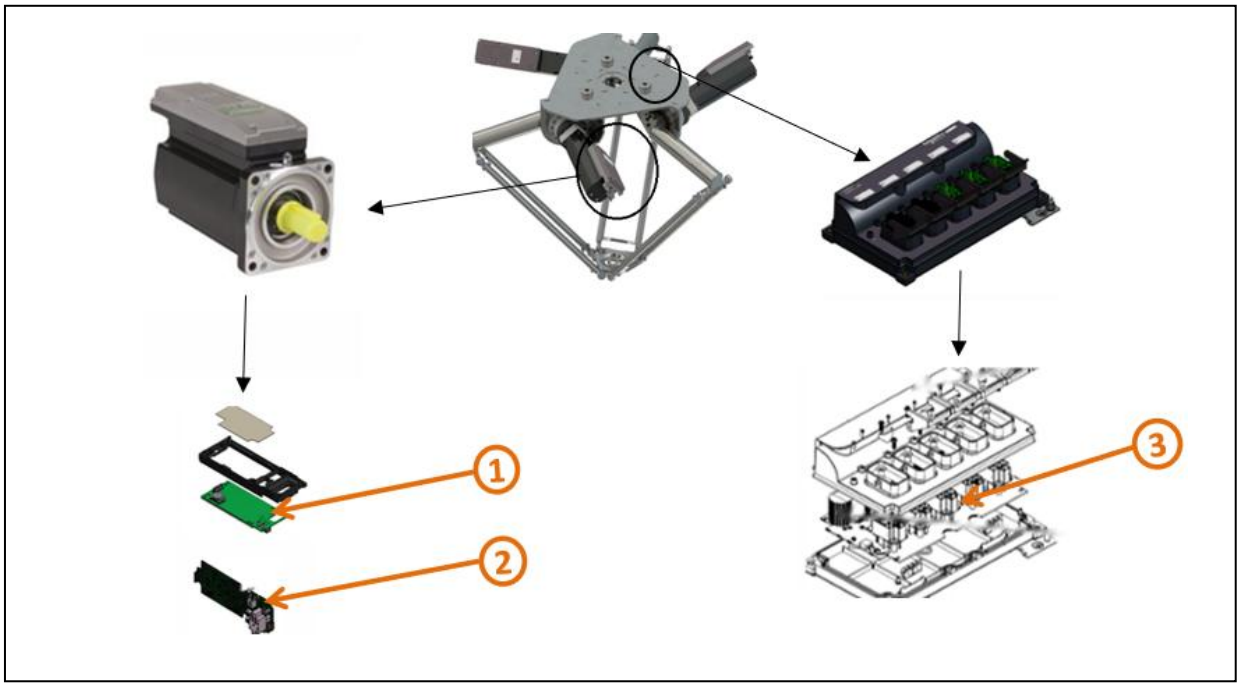
⚠ WARNING

HAZARD DUE TO INSUFFICIENT PROTECTION

- Implement all safety measures required by the applicable regulations and by the processes used to dismantle/disassemble and dispose of the product.
- Use all necessary personal protective equipment such as gloves and goggles.

Failure to follow these instructions can result in death or serious injury.

End of Life Instructions



Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Electronic Board (Power) > 10cm²	46.5	PCBA
To be depolluted	2	Electronic Board (Power) > 10cm²	79.2	PCBA
To be depolluted	3	Electronic Board (Power) > 10cm²	285	PCBA
Other		Metals, Semimetals, Plastics & other parts	104689	Parts except above

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	Lexium P are Delta robots with 3 or 4-axis, for pick & place solutions.
Product reference	VRKP4L0FNO00000
Total representative product mass	105.1 Kg
Representative product dimensions	1350mm x 1200mm x 1000mm
Date of information release	07-2026

Additional information

Legal information		This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.
Recyclability potential	**84%**	The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
