Solis™ C eDLT Button and Cap

Replacement Instructions

For Your Safety

NOTICE

RISK OF SURFACE DAMAGE

Use the removal tool carefully to avoid scratching or damaging the device and surrounding surfaces.
Failure to follow this instruction can result in equipment damage.

Installation

⚠ WARNING

CHOKING HAZARD - SMALL PARTS

Keep small parts, including buttons and end caps, out of the reach of children. If swallowed, these parts may result in a choking hazard. Seek immediate medical attention if ingestion occurs.
Failure to follow these instructions can result in death or serious injury.

NOTE: To ensure a consistent color match, replace all buttons along with the top and bottom end caps as a complete set during this procedure.

1. Remove the eDLT wall control from the wall, discarding the top and bottom end caps. Locate the indent on the bottom face of the lower cap. Using a removal tool, such as a No. 5 flat-blade screwdriver, remove the lower cap.

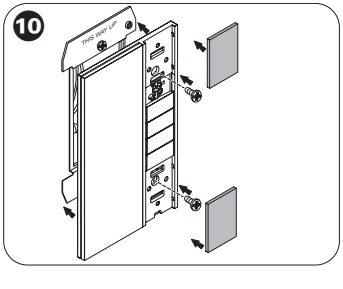
NOTICE

RISK OF PRODUCT DAMAGE

Do not use any tools to prise the button off, as they may damage the product.
Failure to follow this instruction can result in equipment damage.

2. Press and remove the upper button. Gently lift the outer edge of the upper button with your finger until it snaps free.
3. Locate the indent on the bottom face of the upper cap. Carefully remove the upper cap.
4. Repeat step 2 to remove the remaining buttons.

JPW021237-00 10/26



5. Discard all removed buttons, as they cannot be reused and must be disposed of in accordance with local recycling requirements.
6. Take a new button from the supplied packet.
7. Position the button with the button legs facing downward.
8. Press the button firmly until both the top and bottom clips "click" securely into place.
9. Repeat steps 6 to 8 for the remaining buttons.
10. Install the eDLT wall control onto the wall. If required, secure it using the grid fixing screws, then fit the supplied top and bottom caps.
