Two-factor Authentication via Google Authenticator Extension in Chrome Browser

If a user does not have access to the mobile device, then the user can use Google Authenticator Extension on the web browser for authentication.

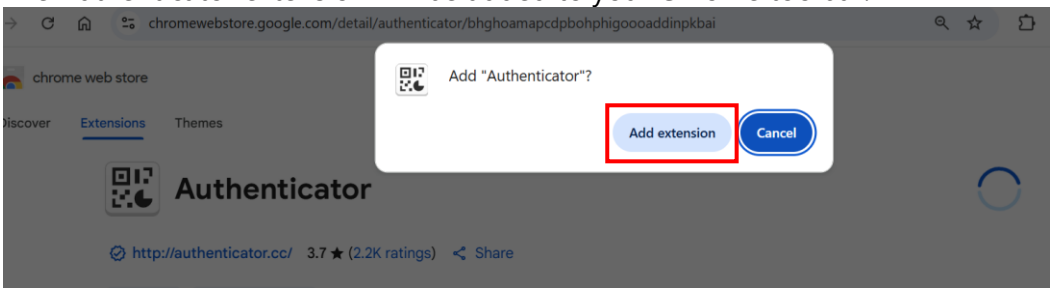

How to Install Authenticator Extension

Perform the following steps to install and setup the Google Authenticator Extension in your preferred browser.
For example, if you are using Chrome as your browser, then:

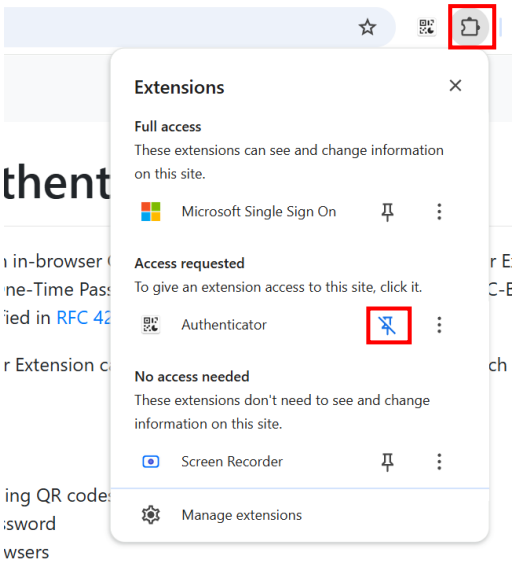

1. Navigate to the Chrome Web Store.
2. In the search bar, type **Authenticator**.
3. Click **Add to Chrome** button next to the extension.

4. A popup will appear. Click **Add extension** to confirm the installation.
   The Authenticator extension will be added to your Chrome toolbar.

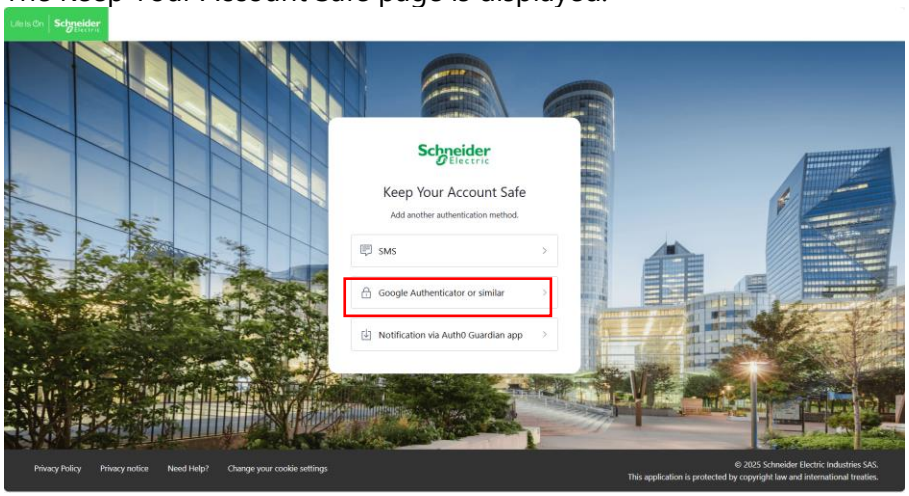

5. **Pin the Extension (Optional)**: You can pin the extension for easier access by clicking the puzzle icon (extensions) and then the pushpin icon next to the Authenticator extension.

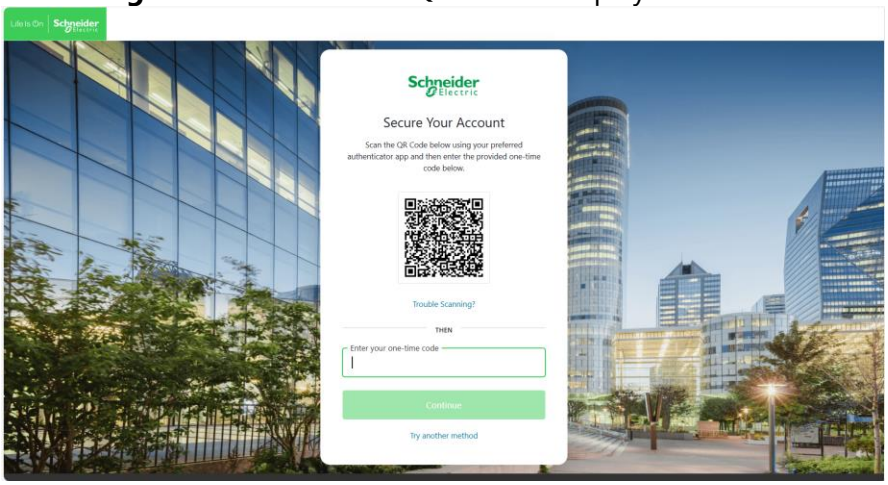

How to Authenticate via Google Authenticator Extension

Perform the following steps:

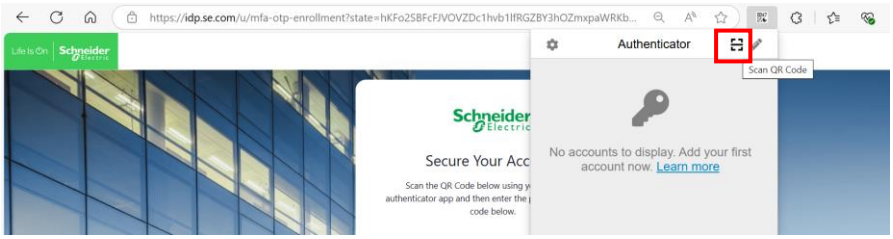

1. Log in to mySchneider with your existing valid credentials.
   The Keep Your Account Safe page is displayed.

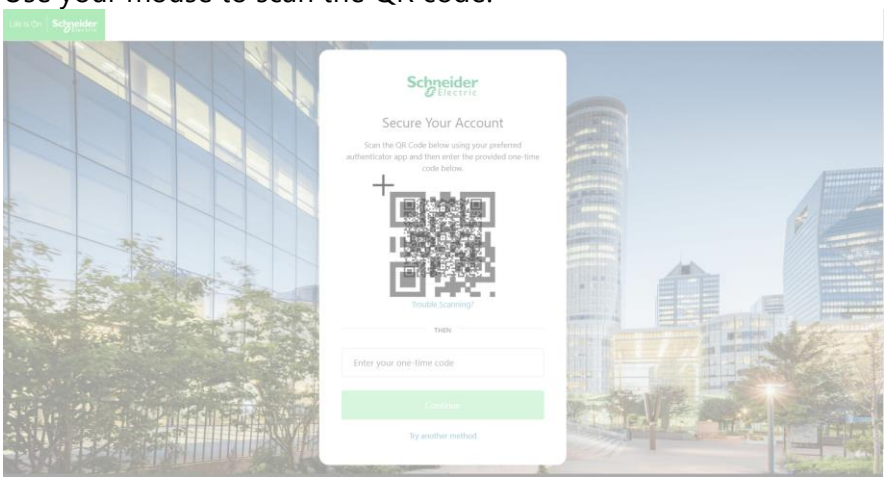

2. Click **Google Authenticator**. A QR code is displayed.

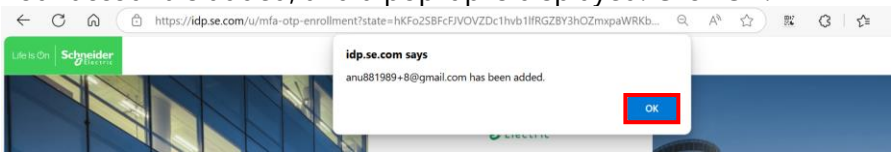

3. Click the extension icon, then the scan icon.

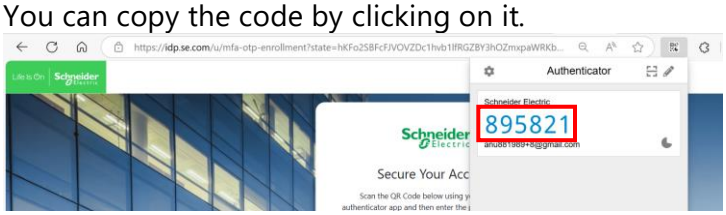

4. Use your mouse to scan the QR code.

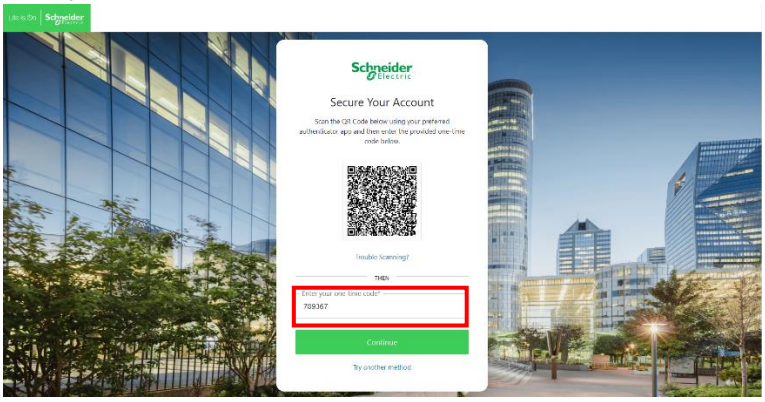

5. Your account is added, and a pop-up is displayed. Click **OK**.

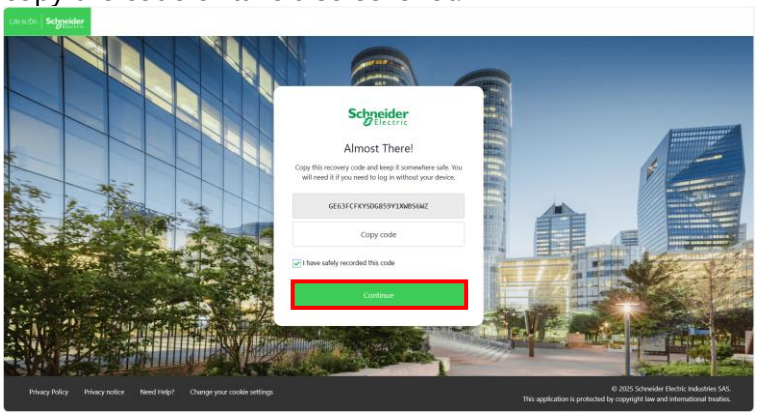

6. Click the extension icon and copy the authentication code.
   NOTE:
   - The code will have a countdown clock, indicating how long the code is valid for.
   - You can copy the code by clicking on it.

7. Enter/Paste the authentication code.

8. Click **Continue**.
   A recovery code is displayed, which will let you log in without your device. You can copy the code or take a screenshot.

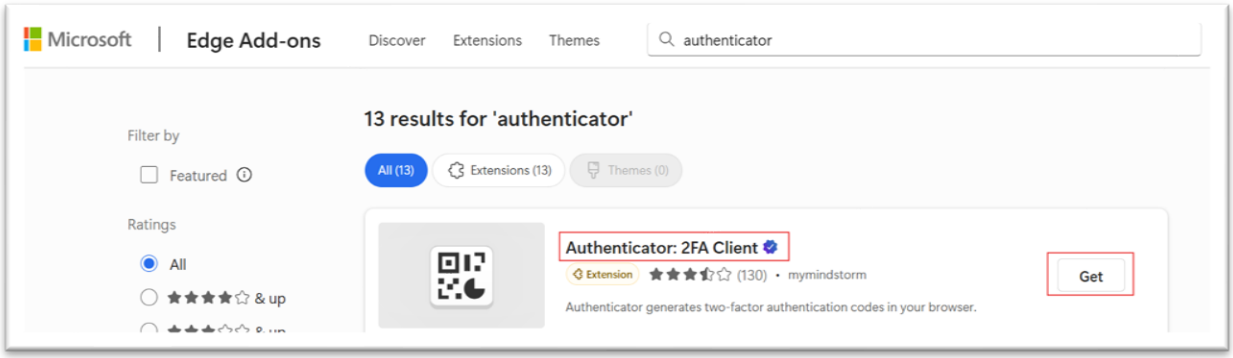

9. Click **Continue**.
   You are now successfully authenticated via Google Authenticator extension.
