APPLICATION NOTE

SHARING INTELLIGENT SOLUTIONS

KEY WORDS:

Title:	Toolkit Operating With Schedule Plus
Products Applicable:	Toolkit, Schedule Plus & HomeGate

On occasions, you may wish to scan a C-Bus network via Toolkit while Schedule Plus is running in simulation mode. If Schedule Plus is already running, there are no processes put in place to stop you from opening Toolkit. When Toolkit opens, the project in question will appear as open, and allow you to attempt to scan the C-Bus networks.

There are some dangers when attempting to do this, as connecting both software packages to C-Gate will mean that there are two sources writing to the installation. This may cause your C-Bus database to become corrupt, and cause erratic problems with your projects.

WARNING

Clipsal Integrated Systems insists that Toolkit is not to be used to program C-Bus units while Schedule Plus or HomeGate are connected to the C-Bus network.
