

CLIPSAL[®]
every room, every home

Precious Metals

The popular Slimline and Eclipse ranges of switches and sockets from Clipsal, have an ultra-slim 4mm profile making them the thinnest single fix accessories in the world. And now a range of Metal Plate covers are available which simply clip straight on, to make these great looking switches look even better!

Slimline and Eclipse, nothing goes on thinner.

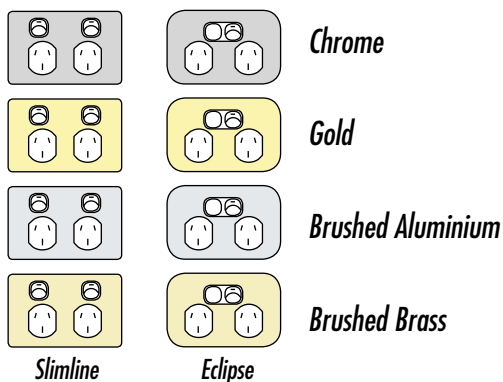

Eclipse Covers

Brushed Aluminium, Brushed Brass, Chrome and Gold, there is a cover to suit all décor. Previously the only option was the more expensive Metal Plate range, now Slimline and Eclipse metal plate covers can add a touch of class at a fraction of the cost. For added convenience all covers are provided separately. Also available, is a collection of Slimline and Eclipse C-Bus compatible switches, perfect for the automated home or workplace. For further information on the Slimline and Eclipse ranges contact your Clipsal representative or log on to clipsal.com

Now no metal cover goes on thinner! The smooth curves of the Eclipse switch enhance its low profile design. The new metal covers provide the look of an all-metal switch at a fraction of the cost.

Slimline Covers

With a plate projection of just 4mm, Slimline is more than 60% thinner than similar switches and sockets.
