

Release Note

Schneider Charge firmware version 2.4.2

Date: 14-09-2026

- **Document scope**

This release note presents the new features and modifications added to Schneider Charge charging station. Download the update file from the [Schneider website](#)

Contents

Enhancement:

- Improved T2S locking mechanism robustness, reducing the occurrence of T2S-related faults.

Known limitations:

- In some rare occasion, the timestamp of the "Transaction.end" message is being reported later than the timestamp of the "StopTransaction" message.
- If multiple charging transactions occur while the charger is offline, there is a risk that transactions may fail when the charger reconnects due to an overloaded message queue.
 - **Recommended workaround:**
 - Keep the charger online whenever possible.
 - If issue occurs, restart the charger to restore normal communication and processing.
