C-Bus Irrigation Control Application

26 IRRIGATION CONTROL APPLICATION

26.1 Application ID

\$71

26.2 Description

This application is defined to confine the messages and use of C-Bus devices, used for irrigation control (such as but not limited to switching watering systems on and off).

The messages used for this application are identical to standard C-Bus lighting control messages. Reference should be made to Chapter 2 of this document set (CBUS-APP/02 C-Bus Lighting Application) for further information.

Important Note: Irrigation systems that make measurements (for example of moisture level) and want to transmit those measurements using C-Bus shall:

- a. be controlled using this application, and***
- b. transmit their measurements using the C-Bus Measurement Application. Refer to Chapter 28 of this document set (CBUS-APP/28 Measurement) for further information.***
