INTEGRITY VERIFICATION PROCEDURE

Integrity Verification of the Modicon Switch MCSESM Firmware SV10.3.04 (.zip)

Before the Software Installation

“Important notes"

(1) For any problems with the download, please contact the support team at se.com.

Before using the provided content, we recommend checking the integrity of the firmware downloaded from the Schneider Electric website.

To verify the integrity of the downloaded files (.zip) of the Modicon Switch MCSESM Firmware SV10.3.04 and proceed as follows:

- Launch any SHA256 generator tool.
- Generate the SHA256 checksum value for the Modicon Switch MCSESM Firmware SV10.3.04.
- If the generated value matches with the value provided in the Checksum List, you can proceed with the installation.
- If they do not match, download the Modicon Switch MCSESM Firmware SV10.3.04 again and repeat the procedure until both checksum values match (1).

Checksum List
